

## The Bistrita river

The Bistrita River (283 Km length) is one of the main tributaries of the Siret River, which is the second affluent of the Danube River in terms of discharge and basin surface. The Bistrita River has an area of 7039 km<sup>2</sup> and contribution to the Siret discharge represent more than 30% (6.6 m<sup>3</sup>/s). The mean altitude of the basin is 914m.

- The Bistrita River has a population about 550 000 inhabitants; from which some 55% live in urban area.

The upper reach of the river, upstream of the junction with the Bârgău River in the village of Punctu Bârgăului is a well known locality, ~~the~~ Bistrician River.

The following towns and villages are situated along the river Bistrita, from source to mouth: Călești, Bistrita Bârgăului, Punctu Bârgăului, Livezuleț, Bistrita.

## Beware of bears

Mark loves nature. He likes very much to go on trips. This time, he went in a meadow near a river.

When he got there, he was exhausted. After he set up the camp, he went into the forest to take branches for fire.

When the night came, he lay on the ground, watching the stars. Suddenly, he heard a sound in some bushes, but he barely got up, when a bear came in front of him. He started to <sup>cry</sup> for help, then he took some branches and started to throw them at the bear. But the bear didn't want to give up on such a tasty meal. Mark looked into the bear's eyes and felt a cold thrill through his body. As the bear was going forward, Mark started to panic and, at one point he took a piece of wood from the fire, and tried to warn the animal, which, feeling the danger, ~~he~~ raised on two feet, and started making lots of noise.

Seeing that he ~~had~~ no chance in front of the bear, Mark crossed the river, but the animal was following him. As he was running, he was taking some stuff from the ground, and throw ~~them~~ at the bear. Finally, Mark climbed up a tree, and sat there more than half an hour, at ~~which~~ point the bear started to get bored. When Mark got back to his camp, he gathered his things, and went into his car, where he spent the rest of the night.

After that day, Mark swore that this was the last time when he went alone in the wood.

## The Nature

It was <sup>~</sup>wonderful <sup>&</sup> day. The birds were singing the butterflies were flying the sheep were running on the large meadows. The flowers gave off the best perfume in the world, but we mustn't forget that all these gifts are offered to us for free by NATURE.

That day I went for a walk and in front of me there was a big hill. I tried to climb it up, but after many trials I felt that the hill was moving. In a great surprise I realised that I was standing on a giant whose name was "Nature".

We started to take the world in length and board. We visited a lot of mountains, hills, plains, which were totally unknown for me till then.

It was a great opportunity for me to discover how wonderful our planet is. But my happiness turned into disappointment when I saw how many polluted areas surround us how many plants and animals suffer from man's unthoughtful activities. Let's be better and give a chance to Nature, otherwise everything around us will be grey and sad. Let's love Nature and make it our best friend! Friends for ever!

## Bistrita River

Bistrita River emanate from Caliman mountains and it is a branch of Somesu Mare River and in it's road it traverse Bistrita city toward the edge of city.

Bistrita River has a big debit of water so downstream built a lake where are 80 milions of cubics meter of water.

For Bistrita city this river is very important because it's water is used by the people who live in the city.

Unfortunately the water of the river is very poluttied because the people don't care and throught the misery in water. Also is very hard to find a clean place on bank because everything is dirty.

But some <sup>of the</sup> people protect the nature and the proof is that, last year the children from four classes where belong I with the teachers from School Number Four, Bistrita went and clean a part of the blank river about 500 m<sup>2</sup>.

This action make me to be proud because I belong to school and all the people have to protect the nature.

# Bithonia River

The Bithonia River (sometimes referred to as Bithonia Redoume River) is a river in the Romanian region of Moldova. Near Bacau it flows in the Bist River.

It flows through the counties Suceava, Neamt and Bacau. The towns Iatso Jarm, Bicaz, Ratic Neamt, Roman, Buhary, Bacau lie along the Bithonia. The upper reach is also known as Bithonia.

River River (Roman: Bithonia) is a Slavonic name in fact, "Bithonia" is a Slavonic name.

Portion of the word "quickly" and most historians consider that ~~it~~ in the past the entire water course

was called "fast" at present, only a tributary of the river has that name. Even if not very well maintained

river Bithonia beautifies the city. In a place to also and many young and not only

going to get rid of them on the bridge and look for Bithonia. Several emblems mounted project to clean river. Even somewhat participated in such a project. I was with all

classes of 7 and I took trash from the banks  
of river. I think people should try to be  
more careful in the corners of nature.

## Our mother... Nature

For us nature is like a mother. She grows us up with her air, plants and birds. She gives us beautiful places, food and health. And what do we give her back? Garbage. We are really bad with our mother. You must think better at what you are doing! With every piece of garbage we hurt the nature. She cries because her children don't love her. Remember! The nature helps you to survive!

# THE NATURE PROTECTOR

The River Watchman

They say that there is somebody up there who loves people and takes care of them. But what about the NATURE? Who takes care of it? Who loves it? Humans don't do that, for sure, instead they throw litter everywhere, they pull down trees for their own purpose, they pollute the rivers, the seas, the oceans....

But somebody must love NATURE. Somebody must protect it!

Having all these in mind I started my journey of searching the BIG PROTECTOR, THE PROTECTOR OF NATURE. Following my thoughts and feelings I reached the Paritita river bank.

I looked around and it seemed to be nobody there...

Oh, but I was wrong! Following a small path I could see an old man moving slowly here and there and picking up all the litter left by the people. I was surprised by his presence and I watched him <sup>attentively</sup>: he was wearing something green, his long white hair was <sup>flowing</sup> on his shoulders, he has got big blue eyes and was holding a sceptre in his hands. But the old man's silence was interrupted by a hurried passer-by. In no time he turned into a wonderful blue wave and jumped in to the river which was flowing slowly over the stones and sand heading to its final destination: the Black Sea.

Well, now I know! I am sure that there is somebody who takes care of our MOTHER-NATURE and this may be a wave, a bird, a blade of grass, a willow-leaf or why not, a child like me and you?

# The Bistrita River

The Bistrita River is a very nice and clean river. It is from Bistrita - Romania. In every year the children from the schools are cleaning the shores of the river.

It flows in Siret, an affluent of Someș River.

In the Bistrita River are leaving so many species of fish.

This is our beautiful  
river - - -

## Summer sunset

Andrei and some other children decided to go to the river to play in the fresh air of nature.

They reached the river bank and they saw wonderful things, the coloured water, crystal clear, and the sky with the sun seemed burning.

Forests were covering all the paradise of flowers which the sun cast over the whole nature and the wind was playing around with the clouds.

The children ran after chasing pollen like butterflies flying over the flowers.

The forest near the horizon looked like a wheat field's sparkling waves bent in the wind.

The birds' song intertwined with children's songs. Bees were dancing in the shade of a tree. We saw a mushroom wearing its hat and a red spotted coat.

Andrei saw a funny frog jumping around. Children decided to play with the ball. Maria was throwing the ball like a fragile bird.

The sun was slowly getting ready for bed and the children were happy to leave for home.

That sunset will remain noted down in the pages of a diary written with much joy and the memories of that wonderful day will remain forever in the children's hearts.

## Bistrita river

The Bistrita is a river in the Romanian region of Transylvania, county Bistrita-Nasud. It is sometimes ~~off~~ referred to as Bistrita River.

Near the city of Bistrita it flows into the Sieu, a tributary of the Someşul Mare River.

The upper reach of the river, upstream of the junction Bârgău River in the village of Pârndu Bôngăului is also known, locally as Bistricioasa River.

## A wonderful day...

Spring came with its procession lying over grasses and meadows. Andrei, Alex and Michael went to the edge of the village in a clearing where a river was flowing with clear water; there were leaves on the trees, bathing in the blue air.

Under the sun, the boys walked and talked about the wonders that nature gave us every day at any time, revealing our true life wonderfully. Boys neared the water passing through the middle of the glade. There was magic if you understood the true mysteries of nature.

After a time they arrived at Magic Alec; the river water was clear, because if you look in it you mirror your face. Alex and Michael started to investigate the place, while Andrei was looking for some shells.

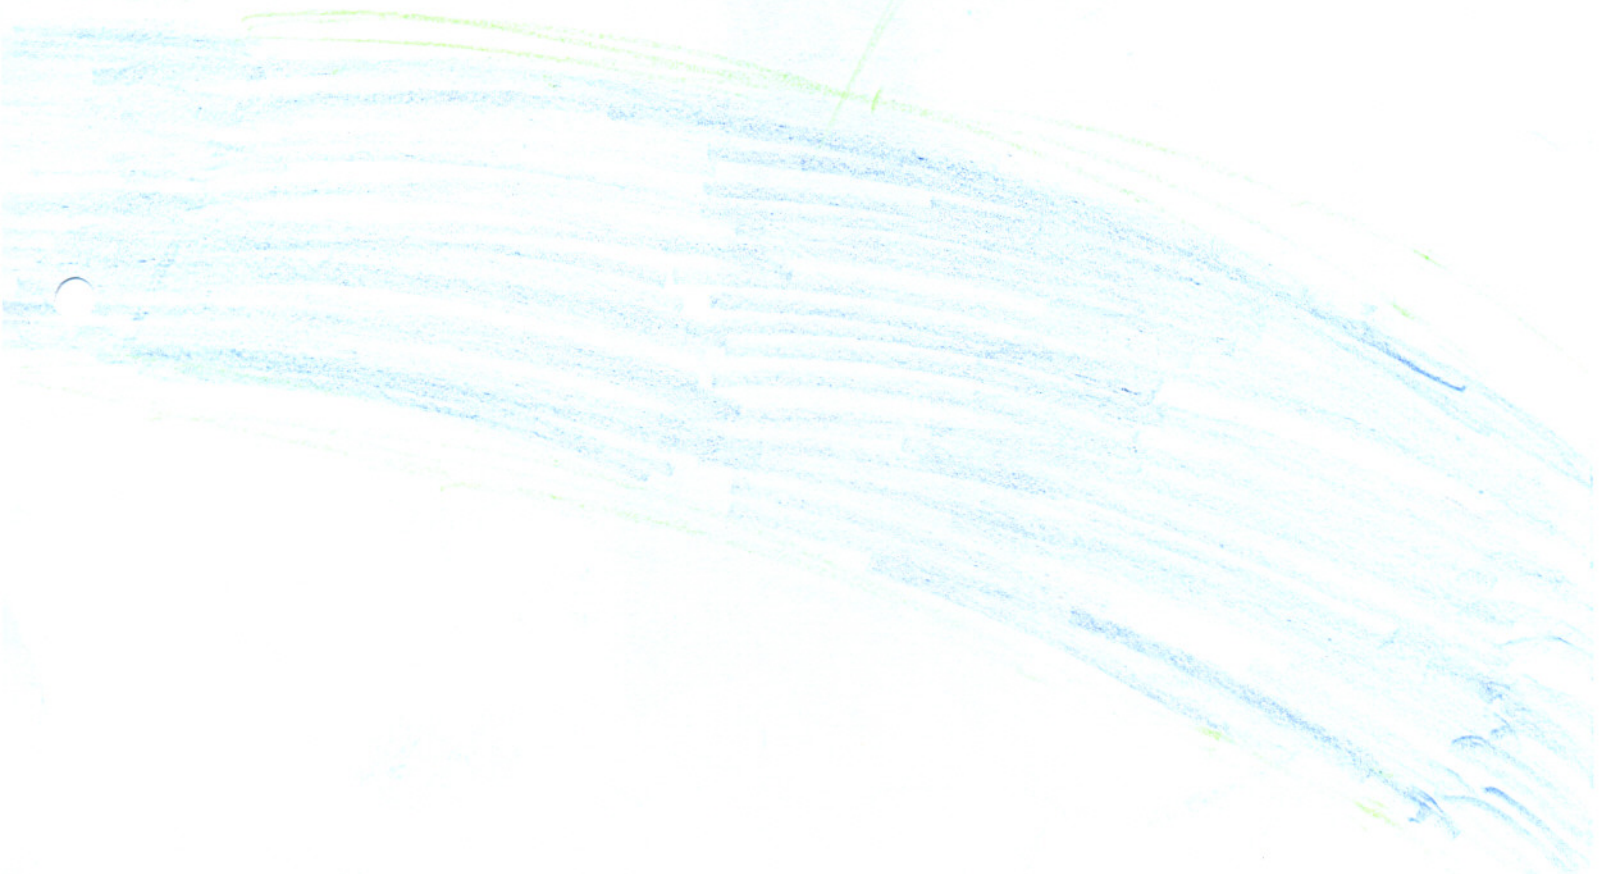

At some point Alex and Michael were a little upset as on the right bank there was some plastic waste; they decided to go there to collect the debris. They got to the location of debris preparing to start work, but the trees were shedding blossoms and rain scents.

Evening was approaching; the three boys set to work seriously, and collected debris all to last, putting them in recyclable nets. They rapidly approaching evening and the sun about to set, the three boys did not have as fun as they wanted, but they had fun helping nature take back the brilliance that it had lost.

The three guys went home with an unimaginable joy, helped the bank clearing nature of waste. Now nature is happy.

## The river of Bixhota

The Bixhota, is the translation of queegly in another language, and a lot of many rivers, considering that with very long time ago, all the cause of the river, it was named queegly.

### Bistrita River

- In this is the river Bistrita attended and General School Number 4 in the greenery of the river Bistrita.
- Bistrita River (also called Transilvania Bistrita River) is a stream, a tributary of the river Sire.
- In fact "Bistrita" is a Slavonic translation of the word "quickly" and most historians consider that the entire course of the past water bore the name of "quickly" date only a tributary of the river is the name.
- The upper, upstream of the confluence with the city Prundu Bărgăului is called by locals and Bistrișoara River.

## The Bistrița river

The Bistrița is a river in the Romanian region of Transylvania county Bistrița - Năsăud. It is sometimes referred to as Bistri Andelearnă River.

Near the city of Bistrița it flows into the Șieu, a tributary of the Someșul Mare river.

The upper reach of the river, upstream of the junction with the Bângău River in the village of Prundu Bârgăului is also known, locally, as Bistrițioara River.

The following towns and villages are situated along the river Bistrița, from source to mouth: Colibița, Bistrița Bârgăului, Prundu Bârgăului, Josenii Bârgăului, Josenii Bârgăului, Livezile, Bistrița.

Every year when the summer comes my friends and I, go to relax and have some fun near a running water, we always prefer not to be far away from our city, so we don't spend very much on the road.

We like very much to spend time in nature because we forget about school and about all that stuff we generally worry about.

In the day when we go out we have a lot of fun, because it is a very nice day with sun. We like to play a lot of games starting with swimming and playing volley ball in the water, and we have a lot of competitions, we play games. When we are hungry we make a fire and cook something very easy for us.

Before we go home we like to clean everything that is left from us because we have to protect nature.

When we get home we are very happy, but tired.

## The lonely frog

Once upon a time there was a sad frog. It was sad because it didn't have any friends.

But one sunny day it goes to the most beautiful river in the world. He wanted to find a friend. When he looks in the river a goldfish jumped out of the water. The older king of the frogs told him where he could find a friend. After all the goldfish said to him, "Do you want to be my friend?" and he nervously says, "Yes, I do!" They lived to a good old age to be

**FRIENDS.**

# Bistrița River

Bistrița River (also called Transilvania Bistrița River) is a stream, a tributary of the river Sireu

Watershed Sireu, major tributaries Gârâtel.

Watershed 612 km<sup>2</sup>

Average flow  $\frac{7,28 \text{ m}^3}{\text{s}}$

Location Bistrița - Năsăud, România. Major tributes: Titimicul the down, Titimicul the up, Pămuletu, Sireu the down, Sireu the up, Stany, Glade, Cusma, Fânățelor, Acorn, Jijia dust, Spring Long, Bărgău, Mountain Valley, Muncelu, Hell, Slatina, Valley Rusului, Târziu.

## Hydronyms

In fact, "Bistrița" is a Glomiac translation of the word "quickly" and most historians consider that in the past the entire water course was that name (called) "fast", or present, only a tributary of the river has that name.

The upper, upstream of the confluence with the city Brundu Bărgăului is called by locals and Bistrițicara River.

River rises in Căliman. Junction with River Sireu Gârâtel occurs in the area.

### Bistrița River

- Bistrița river is a river quite ok some of the 7 classes participated in the meeting a waste of time steps by the water because our river is clean and everyone has to learn not to mind anything can if there see her was to throw some garbage.
- River rises in Carliman. Junction with River Sireu Săratel occurs in the area.

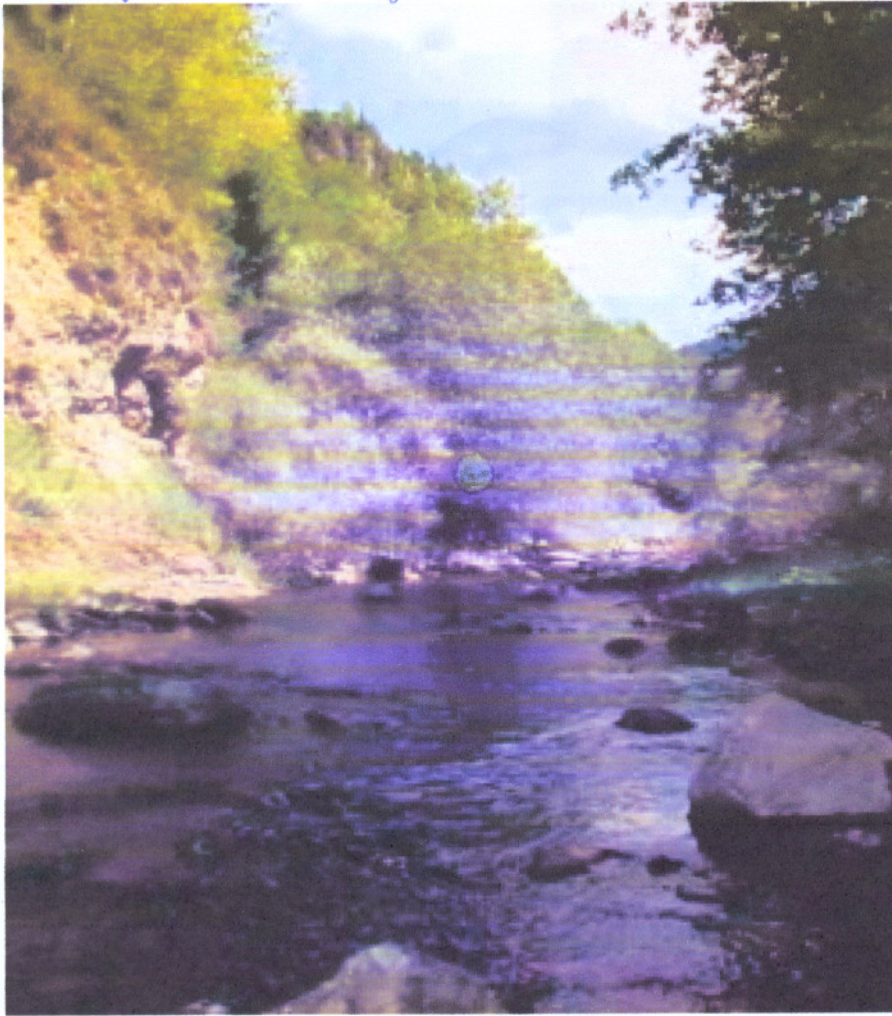

Tamase Alex

## The Bistrița river

The Bistrița is a river in the Romanian region of Transylvania, county Bistrița Năsăud. It is sometimes referred to as Bistrița Ardeleană River. Near the city of Bistrița it flows into the Sireu, a tributary of the Someșul Mare River.

The Upper reach of the river, upstream of the junction, with the Bârgău River in the village of Brundu Bârgăului is also known, locally, as Bistrițiciora River.

The following towns and villages are situated along the River Bistrița, from source to mouth:

Colibița, Bistrița Bârgăului, Brundu Bârgăului, Joseni Bârgăului, Livezile, Bistrița.

The following rivers are tributaries to the river Bistrița:  
on the left: Titimiul de Sus, Titimiul de Jos, Borcut, Băulețu, Repedeș, Stegă, Șoimu de Sus, Șoimu de Jos, Pietrosasa, Peșana, Cusma, Fămatele, Ghinda, Lempeș  
on the right: Colbul, Izvorul Lung, Bârgău, Valea Muntei,

Muncelu, Iad, Slatinița, Valea Ruscului, Târpa.

## Pique-nique on the edge of the river

A beautiful summer day, I decided with my best friends to make a pique-nique near a river. We put near a tree to keep us a little shade, then I remember funny moments spent till then, then the guys learned us to fish, I tried to catch the butterfly, but unfortunately we did not manage, any one of us. The sun shone high in the sky, and we've put in the water, because it was very hot...

I did not know to swim, but I have helped friends, and eventually I learned.

Time passed very quickly, and had to go to the house after eating. We head to the blanket, and surprise!!... there was no basket of food.

After all this fun, none of us noticed that the food was stolen. After a while, I discovered that behind the tree where we put the blanket, our brothers and sisters were small, we ate food...

Definitely will not forget that wonderful day

## Clean river bank

In ~~a~~<sup>one</sup> spring morning, I wanted to ~~have~~ a walk along the bank of the river from my town. I called some friends to accompany me, and we left at 10 o'clock.

I was living near the river, and we quickly came into an area that we didn't really like. We knew that this area was ~~all~~ways full of garbage and waste. But now we had a surprise.

A large group of students and teachers were there and they collected the waste that studied the ecosystem. Being properly equipped, they were scattered on ~~the~~ both banks of the river.

~~He and~~ ~~My~~ friends <sup>and I</sup> were surprised and also delighted that someone finally thought to take measures to clean the area. I started taking ~~with~~ two students and I found out that they were volunteers. Then, we asked for masks, gloves and plastic bags to help them.

In a few hours we finished gathering all the

task. Even though we worked hard, we had a lot of fun and we were happy with what we <sup>had</sup> done.

Later, a car came and took the bags of waste. Also came the director of an important ecology company from the town. He seemed very happy that we helped.

We thought that in a short time, new garbage will gather on the banks of the river so, we asked the director to do something to avoid this.

After a short period, we heard that it was founded a 1.000 dollars fine for throwing waste into the river or its bed.

It seems that the fine worked, because the area is now clean and beautiful.

Bistrița River (also called Transylvania Bistrița River) is a stream, a tributary of the river Sieu.

Watershed Sieu, major tributaries Sărățel.

Watershed 612 km<sup>2</sup>

Average flow 7,28  $\frac{m^3}{s}$

Location Bistrița-Năsăud, România. Major tributes: Titimiul the down, Titimian the up, Stony, Glade, Cusma, Fănatel, Acorn, Tîjia, Pănuțu, Gaimu the down, Gaimu the up, Spring Long, Bărgău, Mountain Valley, Muncelu, Hell, Glatina, Valley Rurului, Tărpău.

• Hydronyms

In fact, "Bistrița" is a Slovenian translation of the word "quickly" and most historians consider that in the past the entire water course was called "post", at present, only a tributary of the river has that name.

The upper, upstream of the confluence with the city Brundu Bărgău Bărgăului is called by locals and Bistrițoara River.

River rises in Găliman. Junction with River Sieu Sărățel occurs in the area.
